The image displays a Gantt chart or project schedule on a grid. The grid is 34 columns wide and 42 rows high. The chart consists of horizontal bars representing tasks or activities, grouped into three vertical color-coded bands: light blue (left), light red (middle), and light green (right).

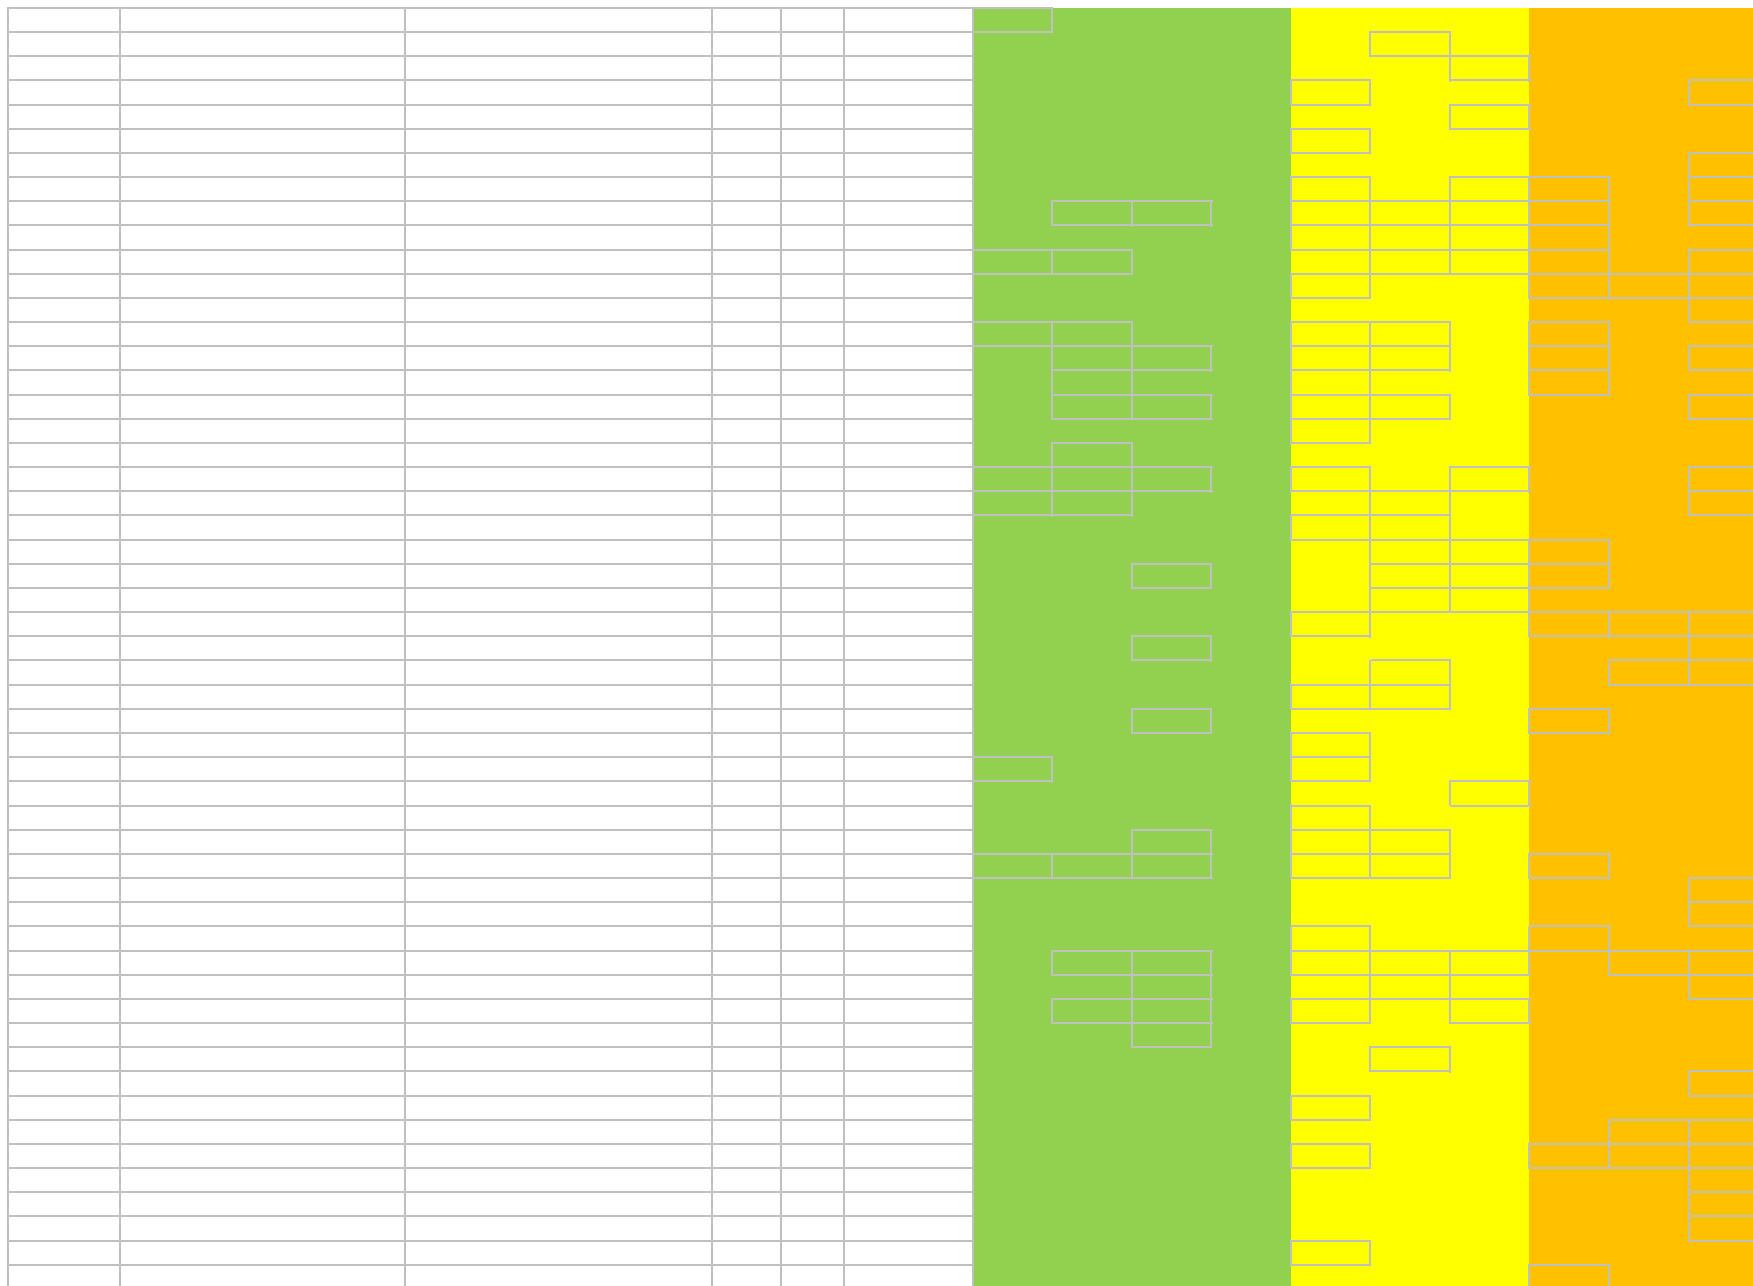

- Light Blue Band (Columns 1-5):** Contains 11 tasks, each represented by a horizontal bar. The bars are distributed across the 42 rows, with some spanning multiple rows.
- Light Red Band (Columns 6-15):** Contains 22 tasks, represented by horizontal bars. This band shows a high density of tasks, particularly in the middle and lower sections of the grid.
- Light Green Band (Columns 16-20):** Contains 10 tasks, represented by horizontal bars. These tasks are primarily located in the upper and middle portions of the grid.

The bars are white with thin black outlines, and their lengths vary, indicating different durations or dependencies between tasks. Some bars span across the boundaries of the color bands.

The image displays a Gantt chart on a 35-column grid. The chart is divided into three distinct color-coded sections: green (left), yellow (middle), and orange (right). The green section spans columns 1-20, the yellow section spans columns 21-25, and the orange section spans columns 26-35. Each section contains horizontal bars representing task durations. The bars in the green section are generally longer, often spanning multiple columns. The bars in the yellow and orange sections are shorter and more fragmented, suggesting more granular or shorter-duration tasks. The bars are positioned at various vertical levels across the 35 rows of the grid.
